"TIME TO CHANGE EVERYTHING"

OUR HISTORY

Mitra Cabinet, founded in 2019 with its innovative spirit, was founded in 1996, that is, 25 years ago, with its superior experience, great knowledge and infrastructure, with a team that took an active part in the establishment of three cabinet brands in Turkey and steered the sector, Rack cabinets and accessories, Telecom field cabinets. (internal / external environment), Server, Data Center Cabinets, Fiber optic, city security systems and solutions with a rich product range for the IT sector. Mitra Cabinet aims to design innovative, ergonomic, economical and functional products with its vision for the future in the developing world. It is an organization focused on suggestions and ideas. Mitra Cabinet has succeeded in designing correct, robust, economical, competitive and useful products with its experienced and strong R&D Department, which was established with 100% domestic capital.

OUR POLICY

As Mitra Cabinet systems, by presenting the power of technology to carry life forward to the society in all our fields of activity; We continue to work to bring our people's dream of a sustainable and smart life to life. We are working to be a part of the innovation economy that has started to emerge as a result of the transformation the world is going through. We know that in the near future, a smart and connected product-service ecosystem focused on consumer experience will emerge with the combination of big data, information technologies and digital communication. Many technological mega-trends such as "Artificial Intelligence", "Augmented Reality (AR)" and "Blockchain" will completely change our lives. Intelligent systems will take on the role of interpreter, constantly communicating between consumers and companies. We, as Mitra Cabinet, continue our work in line with the goal of offering value-added products that produce products and solutions to this world.

Lin-x series cabinets are a low-cost network and server cabinet system designed for network and server, meeting high-density cabling needs. With its modular structure, it is a good option for more storage, less transportation and practical assembly for your cost plans. Offers advanced fiber and copper cable management options; Provides maximum cable capacity for your high-density cabling requirements while simplifying cable installation, maintenance, and easy intervention. It helps.

LIN-XN STANDARD CONFIGURATION

- Aluminum or Metal framed glass front door
- Colorful decorative frame lath
- Locked front cover with handle
- Latch-lock back cover
- Clatch side covers
- 4 pieces of heavy-duty 19" device props with depth adjustment
- 4 pieces of adjustable pinion feet

- In 600mm wide cabinets, there are 2 cable entries in total, 1 on the lower chassis and 1 on the upper side,
- 3 pieces on the lower chassis and 3 pieces on the upper side in 800mm wide cabinets. A total of 6 cable passages are provided.

Lin-x 19" Lin-x Free Standing cabinets, with a carrying capacity of up to 1000 kg, are an ideal solution for providing data distribution in infrastructure cable installations, protecting server devices at a basic level, and dense cabling management. A wide range of cable management accessories are available to provide perfect management for 19" devices. Flatpack option saves up to 60% on transportation cost and warehouse space.

LIN-XS SERVER SERIES STANDARD CONFIGURATION

- 75% perforated flat front cover with mechanism and lever lock
- Locked front cover with handle
- Latch-lock back cover
- Latch-on side covers
- 4 pieces of heavy type 19" device props with depth adjustment
- 4 adjustable pinion feet
